Making the nose

Artificial Intelligence: speech synthesis

Artificial Intelligence: squeeze convolution

Artificial Intelligence: letters recognition

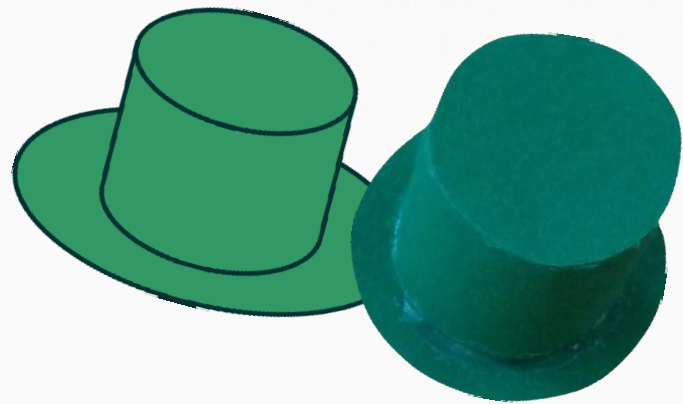

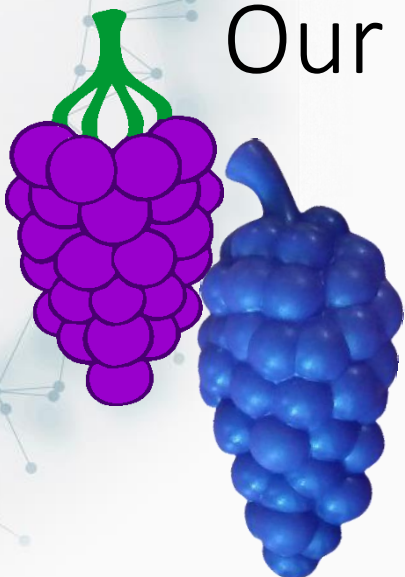

Artificial Intelligence: 3D object recognition

The image displays a computer interface for 3D object recognition. On the left, a terminal window shows a list of objects: "cube grape carrot" repeated multiple times. In the center, a video frame shows a yellow cube, purple grapes, and an orange carrot on a white surface. The objects are labeled "cube", "grape", and "carrot" in red text, and each is enclosed in a blue bounding box. Below the bounding boxes, the coordinates "(x=303, y=59) ~ R:254 G:254 B:254" are displayed. The background of the video frame shows a 3D scene with a blue patterned surface and a green sofa. The bottom of the interface shows a status bar with "LF UTF-8 Python git+ GitHub Git (0)".

Hi, we are a team NON STOP from St. Petersburg, Russia!
Please contact us! :)

The banner for 'NON STOP Project Pinotino' features a collage of images: a robot with a white head and a blue vest, a group of seven team members in blue 'StarLine' shirts, a person in a white suit waving, a colorful pinotino character, and a close-up of a robot's mechanical components.
